

# Trinity Lutheran Church

## Control Measures and Protocols for Mitigation of Covid 19 Pandemic

### **Sanitizing facilities**

Each group that uses Trinity facilities is expected to perform the following sanitizing protocols before leaving the areas that they have occupied:

Frequently touched hard surfaces such as tables, chairs and pews, door handles, light switches, and elevator button panels will be wiped with a solution of 1000 ppm sodium hypochlorite (bleach) on a disposable wiping cloth

Pew cushions and other cloth upholstered surfaces will be sprayed with a 70% solution of isopropyl alcohol (rubbing alcohol) and allowed to dry.

Fixtures in all restrooms used by the group will be sanitized.

All common area door handles, light switches, handrails, and elevator (if used) will be sanitized.

If more than one group is using the facility at the same time, they may share the duties of sanitizing of common areas

Surfaces that are wiped or sprayed with disinfectant should stand at least 10 minutes before being used

Sanitizing products and materials will be provided and will be stored in the usher's cabinet in the narthex

Bleach will be mixed in the custodian's room on the lower level.

Closable no-touch waste receptacles will be provided in each area for the disposal of the wiping cloths

### **Personal protective equipment**

Sanitizers will wear a cloth mask

Sanitizers will wear disposable gloves while sanitizing

Sanitizers should wear long sleeves when sanitizing

### **Cleaning facilities**

Regular cleaning of facilities will be accomplished by custodian and volunteers
